

ADVANCED SPECIALTY CHEMICALS & WATER TREATMENT SOLUTIONS

Pure Water | Healthier Life | A Sustainable Future

For a Better World

ABOUT US

Vepiox Private Limited delivers high-performance specialty chemicals designed to optimize operational efficiency, protect industrial assets, and extend system lifespans.

Our chemical formulations ensure peak performance, reduced downtime, and compliance with environmental standards across industrial water treatment systems.

PRODUCT PORTFOLIO

1. REVERSE OSMOSIS (RO) TREATMENT CHEMICALS

Engineered to maximize membrane efficiency, reduce fouling, and lower operating costs.

- **Antiscalants:** Prevent mineral scaling and precipitation on membrane surfaces.
- **Biocides:** Control biological growth, bio-fouling, and slime formation.
- **Membrane Cleaning Chemicals:** Specialized acidic and alkaline formulations to restore membrane flux and performance.
- **Dechlorinating Chemicals:** Protect chlorine-sensitive polyamide membranes from oxidative damage.

2. FLOCCULANTS, COAGULANTS & DEFOAMERS

Optimized solutions for primary water clarification and industrial wastewater management.

- **Coagulants:** Neutralize charge and destabilize suspended solids for rapid settling.
- **Flocculants:** Form large, dense flocs to enhance liquid-solid separation in wastewater systems.
- **Defoamers:** Fast-acting foam control agents to stabilize process fluids and prevent overflow.

3. BOILER WATER TREATMENT CHEMICALS

Formulated to prevent severe scaling, pitting, and system corrosion in steam generation units.

- **Antiscalant & Corrosion Inhibitors:** Protect boiler tubes from mineral deposits and metal degradation.
- **Multifunctional Boiler Water Chemicals:** All-in-one chemical treatments for scale, sludge, and corrosion control.
- **Oxygen Scavengers:** Rapidly eliminate dissolved oxygen to prevent severe pitting corrosion in feed lines and boilers.
- **Descaling Chemicals & Cleaners:** Efficiently dissolve existing mineral scale and rust deposits to restore thermal efficiency.

4. COOLING WATER TREATMENT CHEMICALS

Designed to preserve heat exchange efficiency and protect cooling towers from biological buildup.

- **Biocides & Biodispersants:** Non-oxidizing and oxidizing formulations to eliminate algae, fungi, legionella, and biofilms.
